CS05-06 CHAIN SAWS

The CS06 chain saw sets the standard for power-to-weight ratio in the market. With an inter-locking trigger, hand guard, low kick-back bars and chains, and no chain coasting upon trigger release, it's a safe and reliable option. Its flow range of 7-9 gpm (26-34 lpm) makes it versatile for different hydraulic circuits. Despite weighing under 7 pounds, the CS06 boasts 8 to 10 horsepower of cutting power, delivering twice the power of a gas engine chain saw with half the weight.

CS05-06 CHAIN SAWS

FEATURES

- Highest power to weight ratio of any chain saw on the market
- All models feature interlocking triggers, hand guards, low kick back bars and chains
- No chain coasting when you release the trigger
- Kickback is reduced without the centrifugal force from the flywheel used on gas driven saws
- Ideal for bucket truck use because of their wide range of flow and pressure requirements
