

STANLEY®

POWERFUL AND LIGHTWEIGHT

20,000 lbs (89,000 Nm) of force, yet weighs only 90 lbs (41 kg)

WELL BALANCED DESIGN

Ensures safe and easy handling

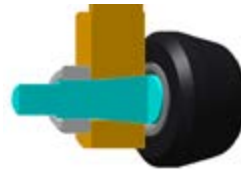

IMPROVED ROLLER SYSTEM

Tapered roller shaft for increased durability

EASY ALIGN BLADES

Enhanced alignment ensures precision and efficiency

WS10 WELD SHEARS

STANLEY's Weld Shear combines power and lightweight design, making it the perfect tool for shearing thermite welds and head repairs with over 20,000 lbs (89,000 Nm) of force. The WS10321A features an efficient, well-balanced, and ergonomic design that allows for shearing before dismantling the weld mold, reducing setup time and boosting productivity. Its in-line pump handle ensures stability by preventing rocking on the rail during operation.

WS10 WELD SHEARS

FEATURES

- In-line handle improves control and reduces wrist strain
- Controls placed away from shear for operator safety
- The 4 easy-to-set-up hold downs are quarter-turn clamps that secure the weld shear to the rail, allowing for quick setup, adjustable tightness, and accommodation of different application needs for precise operation
- Redesigned roller shaft to enhance strength and durability
- Internal flow control maintains controlled shear speed to mitigate risk of hot tears
